PROFESSIONAL SUMMARY

Software Developer with 4+ years of Flutter experience building production-ready mobile and desktop applications across e-commerce, POS, real-time communication, CRM, and business solutions. Strong in Flutter, Dart, Firebase, REST APIs, Supabase, Bloc, Riverpod, GetX, Clean Architecture, Socket.IO, and WebRTC.

Experienced in React and Next.js for web applications, with strengths in API integration, performance optimization, debugging, deployment, and project ownership. Proven ability to lead development, maintain scalable codebases, and deliver reliable applications.

CORE TECHNICAL SKILLS

Mobile: Flutter, Dart

Web: React.js, Next.js, JavaScript, TypeScript, HTML5, CSS

State Management: Bloc, Cubit, Riverpod, Redux, GetX, Provider

Architecture: Clean Architecture, Feature-Based, MVC, MVVM

Backend & APIs: REST APIs, Dio, HTTP, Node.js, Express.js, API Integration, JWT

Cloud & Database: Firebase, Supabase, SQLite, Drift, Hive

Real-Time & Communication: Socket.IO, WebRTC

PROFESSIONAL EXPERIENCE

Aamir Tech | SDE II

Jan 2026 – Present

- Develop and maintain scalable Flutter, React, and Next.js applications, covering both mobile and web requirements.
- Take ownership of frontend development, API integration, and backend support, while contributing to project architecture and technical decisions.
- Lead project development, troubleshoot technical issues, and ensure clean, maintainable, and high-quality code following development best practices.

Technologies: Flutter, Dart, React, Next.js

Yachii | Flutter Developer

Aug 2025 – Dec 2025

- Developed and maintained Flutter applications using Dart, implementing new features and integrating REST APIs.
- Optimized application code and architecture to improve performance, speed, responsiveness, and overall stability.
- Maintained existing codebases and used AI-assisted development tools to improve development efficiency, troubleshooting, and problem-solving.

Technologies: Flutter, Dart, REST APIs, AI-assisted Development Tools

Alison Tech Lab |Software Developer — Flutter & React

Nov 2024 – Aug 2025

- Developed and maintained Flutter and React applications for mobile and web platforms, implementing frontend features and REST API integrations.
- Optimized application logic and frontend implementations to improve performance, responsiveness, code quality, and stability.
- Troubleshot application issues and maintained existing codebases while using modern development practices and AI-assisted tools to improve development efficiency.

Technologies: Flutter, Dart, React, JavaScript, REST APIs, React use State, AI-assisted Development Tools

CK BETON ReadyMix LLC — Abu Dhabi, UAE | Software Developer

Jul 2023 – Nov 2024

- Developed internal Flutter applications and business tools to support operational requirements and improve internal workflows.
 - Maintained and supported existing web applications, resolving application issues and ensuring reliable functionality.
 - Investigated and resolved software and application-level issues, providing ongoing improvements and technical support for internal applications.
-

CLAN LEO Pvt Ltd |Flutter Developer & Team Lead

Aug 2022 – Mar 2023

- Led development of Flutter applications, maintaining clean, structured codebases and following development best practices while supporting legacy application migration and improvements.
- Investigated and resolved application bugs and technical issues, conducted R&D on technical solutions, and collaborated on UI/UX improvements.

- Provided technical guidance and development support to team members, contributed to mentoring junior developers, and worked within Agile development practices.
-

Bethel Technology | Junior Flutter Developer

Feb 2022 – Aug 2022

- Developed Flutter applications using Dart, including the Gaadi Parts application with real-time Firebase functionality.
 - Collaborated with testers and UI designers to implement, validate, and deliver application features.
-

PROJECTS

Sellora POS

Flutter | Dart | Drift | Riverpod | Supabase | REST APIs

Offline-first POS and shop management application designed to support multiple shops and business operations.

- Independently developed an offline-first Flutter POS application using Drift/SQLite, covering sales, billing, inventory, purchasing, returns, payments, customers, suppliers, employees, and reporting workflows.
 - Built local-to-cloud synchronization with Drift and Supabase, including batched sync to reduce API requests and keep sales operational during unstable internet connectivity; implemented RBAC and multi-shop data isolation.
 - Integrated thermal printing, barcode/QR scanning, PDF invoices, and Excel/CSV functionality, while optimizing database queries, indexing, pagination, lazy loading, debounced search, and API usage for improved performance.
-

YChat

Flutter | Dart | Firebase | Socket.IO | WebRTC | REST APIs | Node.js | BLoC | FCM

Real-time communication application supporting messaging and real-time audio/video communication.

- Developed Flutter application modules implementing real-time text messaging, audio calling, video calling, and screen sharing using Socket.IO and WebRTC.
- Integrated authentication, push notifications, and REST APIs, and resolved a persistent Socket.IO connection issue through troubleshooting and collaboration with experienced developers.
- Completed the MVP and successfully deployed the application to both the Google Play Store and Apple App Store.

Dor to Dor24

Flutter | Dart | Firebase | REST APIs | GetX

Production e-commerce application designed for small shops in GCC markets.

- Developed the Flutter frontend with authentication, product management, shopping cart, order management, and billing functionality.
- Integrated Firebase services and REST APIs, with support for English and Arabic localization across the application.
- Delivered a cross-platform Android and iOS application and supported its production release on the Google Play Store.

Trip Mango CRM

Next.js | Supabase | REST APIs | Clean Architecture

Internal CRM platform designed to help travel-company employees manage lead generation and lead-to-sales workflows.

- Developed the Next.js frontend and Supabase-backed CRM, implementing lead generation, follow-ups, customer management, sales workflows, and customer history.
- Implemented RBAC, REST APIs, notifications, Clean Architecture, and responsive web/mobile interfaces, with a focus on maintainability and performance.
- Managed client communication and requirements, handled end-to-end feature development, and currently developing the CRM toward MVP delivery.

EDUCATION

Bachelor of Science in Computer Science

Graduated: 2021
